OUTLINE

How well do students know their classmates? Let's find out!

MATERIALS

Worksheet

PREPARATION

- 1 worksheet for each student

HOW TO

Give each student 1 worksheet.

Students move around the class and find a partner.

Ask each other 1 question:

- A "Which do you like better, snow or rain?"

Before B answers, A guesses what the answer will be by circling their guess on their own worksheet.

- B "I like snow better than rain."

If they guessed correctly, A checks the point mark in the question box on their own worksheet.

If they guess incorrectly, A does not check the point mark.

After both students have asked 1 question each, move around the class and find a new partner.

Continue until students have asked each question once.

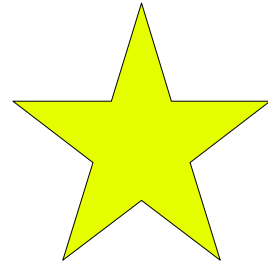

You Know Me

NAME

A Which do you like better,
snow or rain?

B I like snow better than
rain.
